

# PART NUMBER INDEX

This index is listed in the following sequence.

## GENERAL PARTS

EXAMPLE

- ① first, in the sequence of group (5th & 6th digits)
- ② second, in the sequence of part (7th–9th digits)
- ③ third, in the sequence of model/type (1st–4th digits)

## STANDARD PARTS

Standard Parts are listed in numerical sequence after General Parts.  
(Note: Those parts which do not have D-Code are not listed in the index.)

**INSTRUCTION**

The following charts provide you with the general layout and contents location of Mazda parts catalogs, but some sections may vary slightly in detail.

# DATA FLOW & LOCATION NUMBERING

The flow of data is always from the top to the bottom and from the left to the right. It is continued on to the next fiche in the set and on through to the ending frame on the last fiche in the set.

# INSTRUCTION

(M)

## HOW TO LOCATE PARTS

### FIRST AND MOST IMPORTANT

Assure that you have the Correct Fiche Set, by confirming the MODEL NAME and PRODUCTION YEAR (or MODEL YEAR) on the fiche title.

#### LOCATING PARTS FROM "ILLUSTRATED SECTION REFERENCE CHART"

1. Place the proper fiche in the projector: either Engine, Chassis or Body fiche.
2. Refer to "Illustrated Section Reference Chart" located on the extreme left frames in a vertical row (loc. C1 thru i1) and locate the illustrated section and its Section Number under which the desired part may be found.
3. Refer to "Section Number Index" located in the top row and find the indicated Section Number and its Location Number.
4. Proceed to the "Illustration-Text" frame at the indicated Location Number and find the illustrated part desired and its D-Code.
5. Locate the indicated D-Code in the text shown opposite.  
(The D-Code appears in numerical sequence in the text.)
6. The Part Name, Part Number, Quantity, etc. desired are listed adjacent to the D-Code.

#### LOCATING PARTS FROM "SECTION NUMBER INDEX"

If you know the Section where the desired part may be found, take the same procedure as the above except for paragraph 2.

#### LOCATING PARTS FROM "PART NUMBER INDEX"

1. Place "Index" fiche in the projector.
2. Refer to "Part Number Index" (if a part number is known) and find the Part Number and its Location Number.
3. Select the proper fiche according to the indicated Location Number; the first digit of Location Number indicates the fiche number in the set, e.g., Location Number 1-E6 indicates frame No. E6 of fiche No. 1 in the set. And place it in the projector.
4. Proceed to the "Illustration-Text" frame at the indicated Location Number, and find the Part Number in the text.
5. The D-Code, Part Name, Quantity, Model Application, etc. desired are listed adjacent to the Part Number in the text. An illustration of the Part is also shown opposite.

[Note]

The indexing sequence of PART NUMBER INDEX is as follows.

GENERAL SPARE PARTS are listed in the group number sequence such as in the center two digits of part No.

STANDARD PARTS are listed after General Spare Parts, in numerical sequence.

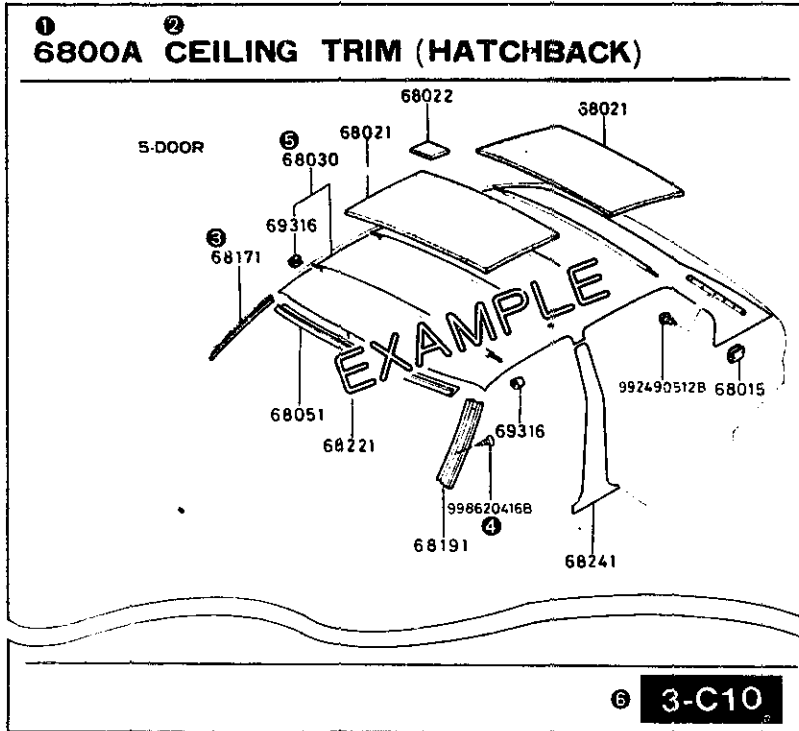

#### LOCATING PARTS FROM "ALPHABETICAL INDEX"

1. Place "Index fiche" in the projector.
2. Refer to the "Alphabetical Index" of your language block and find the Part Name, D-Code and Location Number of the desired part. If there are more than one Location No. indicated for one Part Name, judge by the D-Code which frame may show your requirement.
3. Research your requirement by using the indicated Location Number and Part Name, i.e., very similar to the procedure outlined in paragraph 3 thru 5 above, "LOCATING PARTS FROM PART NUMBER INDEX".

# INSTRUCTION (Cont'd)

## HOW TO INTERPRET THE ILLUSTRATION

(M)

In the example shown above, the interpretation of each item appearing in the illustration area is as follows.

### 1 SECTION NUMBER

Each illustration is given a Section Number, which is a "IDENTIFICATION NUMBER" of the group of parts classified in function.

Section Number basically consists of four numeric characters and alpha "A". But when a Section (a group of parts) is shown in more than one illustration over the same catalog, an additional alphabetical character is incorporated, e.g.,

Section No.	Section Name
6800A	Ceiling Trim (Hatchback)
6800AA	Ceiling Trim (Wagon)

[Note]

Illustrations are always arranged in numerical sequence by SECTION NUMBER throughout the fiches in the set. (Exception: Section No. "0900A key Sets" is located in the first section of Body group.)

### 2 SECTION NAME

This is a descriptive name of the illustration (the group of parts).

### 3 D-CODE (KEY NUMBER)

D-Code consists of five or six digits, and serves as a "KEY NUMBER" to co-ordinate a part's illustration with its related text.

[Note]

Those parts which appear in the illustration without D-Code are not available as spare parts. (Exception: Most Standard Parts do not have D-Code, but are available as spare parts.)

### 4 STANDARD PART NUMBER

Those parts which are standardized in form, dimension, material, etc. such as bolts, nuts, washers, etc. are called "Standard Parts". In most cases, Standard Part Numbers are shown on the illustration instead of via the D-Code, and are distinguished from D-Code by the number which consists of nine or ten digits starting with "9", e.g., 99862-0416B. Those Parts do not appear in the text and part number index.

### 5 ASSEMBLY AND COMPONENTS' RELATIONSHIP

The relationship between an Assembly and its Components is indicated in the illustration but not in the text.

If the D-Code appeared as the example, the correct interpretation of that would be: D-Code 68030 includes D-Code 69316 and Top Ceiling (no D-Code indicated).

### 6 LOCATION NUMBER

This is to indicate a location of the frame on the fiche.

# INSTRUCTION (Cont'd)

## HOW TO INTERPRET THE TEXT

(M)

### IMPORTANT

As there are many abbreviated words used in the text, refer to "Abbreviation List" located in the lower corner of each fiche (frame No. N1).

C800A-1 CEILING TRIM (HATCHBACK)

D-CODE (Key No.)	PART NAME	PART No.	Qty.	MODEL/DESCRIPTION	VIN (Chassis No.)
68030	CEILING, TOP CIEL DE PAVILLON CIELO INTERIOR DEL TECHO DACHBESPAUNUNG	8531-68-030	1	(USE W/DEFROSTER) 3-DOOR	
	BLACK	00			
	BEIGE	31			
	BLACK	00		(USE W/O DEFROSTER) 5-DOOR	
	BEIGE	31			
68051	PLATE, T/CEILING	8531-68-051	1		FA4PS... 500001 -522626 FA4TS... 500001 -688439
					FA4PS... 522627- FA4TS... 688440-
				<AN>	
		*8531-68-051A	1		

In the example shown above, the interpretation of the information appearing in each column is as follows.

### 1 D-CODE (KEY NUMBER)

This is to serve as a "KEY NUMBER" to co-ordinate with a part on the illustration. Those parts which are identical in function and descriptive name, are given a common code over the Mazda Spare Parts. Within each Section Number, the D-Code appears in numerical sequence.

### 2 PART NAME

Part Names are shown in English and/or French and/or Spanish and/or German, depending upon Catalogs and are given to each "D-CODE".

### 3 COLOR NAME

Color Names appear here when Color Codes are indicated in the "PART No." column. These are shown in English only.

### 4 PART NUMBER

Under the same D-Code, if there are more than one Part Number, Part Numbers are always listed in numerical and/or alphabetical sequence regardless of the order of modification history of parts.

### 5 COLOR CODE

When Color Code(s) appear(s), the indicated Part Number requires the Color Code to properly identify the color of the part, e.g., 8531-68-030 00, 8531-68-030 31.

### 6 QUANTITY

This denotes the Quantity of each part number per the D-Code used on the applicable model(s).

### 7 DESCRIPTION

An additional descriptive information for each part is provided as necessary.

### 8 MODEL APPLICATION

Model Application for a part is shown in this column if necessary.

If there is no Model Application indicated, the affected part is applicable to "ALL MODELS" covered in the page.

For further information, refer to "HOW TO INTERPRET THE MODEL APPLICATION" shown later (frame No. G16).

### 9 INTERCHANGEABILITY CODE

The code in < > brackets appearing in this column indicates the level of interchangeability between the indicated part and the former one.

For the definition of the Codes, refer to "INTERCHANGEABILITY CODE LIST" shown in the lower corner of each fiche (frame No. N1).

### 10 NEW PART NUMBER'S SIGN

An asterisk (\*) appearing in the "Part Number" column indicates that the affected Part Number has been newly added since the last edition.

### 11 VIN (CHASSIS No.)

VIN (Vehicle Identification Number) is shown in this column if necessary, to identify the vehicles applicable to the affected part.

For further details, refer to "HOW TO INTERPRET THE VIN (CHASSIS No.)" located in frame No. H16 of this fiche.

## INSTRUCTION (Cont'd)

### HOW TO INTERPRET THE MODEL APPLICATION

Model Application does NOT ALWAYS APPEAR. No "Model Application" indicated denotes that a Part is applicable to ALL MODELS covered by the affected page.

If the information in the "MODEL/DESCRIPTION" column appeared as the example below:

4000A-1 EX. SYSTEM (HATCHBACK) 

D-CODE (Key No.)	PART NAME	PART No.	Qty	MODEL/DESCRIPTION	VIN (Chassis No.)
40061	HANGER, SILENCER SUPPORT, ECHAPPEMENT SOPORTE, SILENCIADOR DAEMPFUNGSRING	3874-40-060	1	①	
40081	BRACKET SUPPORT SOPORTE HALBEWINKEL	3952-40-080A	1	U.K. 1000 U.K. 1400	②
		8021-40-080C	1	GENERAL AUSTRALIA 1300	③

... the correct interpretation of the above would be:

- ① Part No. 3874-40-060 is applicable to All of Hatchbacks.
- ② Part No. 3952-40-080A is applicable to the Hatchbacks of 1000cc engine for \*U.K. and of 1400cc engine for U.K.
- ③ Part No. 8021-40-080C is applicable to All Hatchbacks for General Areas and for Australia, and All the 1300cc Hatchbacks (including 1300cc for U.K. if applicable).

\*U.K. = The United Kingdom

# INSTRUCTION (Cont'd)

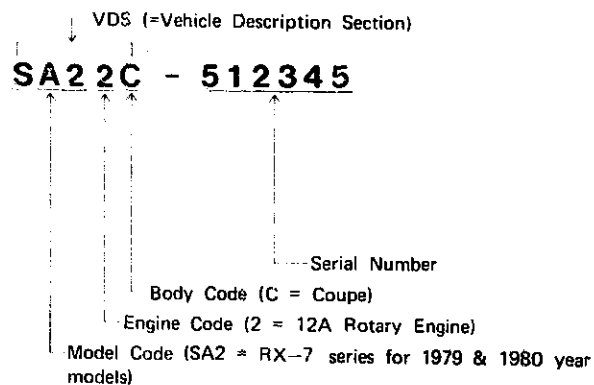

(M)

## HOW TO INTERPRET THE VIN (CHASSIS No.)

### VEHICLE IDENTIFICATION SYSTEM FOR MAZDA RX-7 (1979 & 1980 YEAR MODELS)

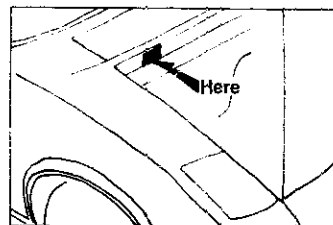

All vehicles are identified by the VEHICLE ID. No. (VIN = Chassis No.) that consists of VDS and Serial Number. VDS (Vehicle Description Section) consisting of five or six alphanumeric characters denotes the "MODEL SERIES". The Serial Number consisting of six numeric characters denotes the Serial Unit Number of vehicle and is sequentially numbered within each VDS.

#### EXAMPLE

#### LOCATION OF VIN PLATE

The plate is attached to the top ledge of the Dash Panel under the Bonnet (Engine Hood), refer to the illustration shown right.

## VIN PRESENTATION ON THE PARTS CATALOG

VIN does NOT ALWAYS APPEAR. No "VIN" indicated denotes that a Part is applicable to the affected model from the FIRST PRODUCTION and ON (up to now).

If the information in the "VIN" column appeared as the example below:

6230A-1 BACK DOOR MECHANISMS (HATCHBACK) 

D-CODE (Key No.)	PART NAME	PART No.	Qty	MODEL/DESCRIPTION	VIN (Chassis No.)
62210A	HINGE, BACK DOOR	8531-62-210B	2	1000	FA4PS . . . 500001 -522626
				1300	FA4TS . . . 500001 -688439
		-8531-62-210D	2		FA4PS . . . 522627
					FA4TS . . . 688440 FA4US . . . 500001
62310	LOCK, BACK DOOR	8531-62-310B	2		

... the correct interpretation of the above would be:

- ① Part No. 8531-62-210B is applicable to Model 1000 from VIN FA4PS-500001 thru FA4PS-522626 and Model 1300 from VIN FA4TS-500001 thru FA4TS-688439 for the Hatchback respectively.
- ② Part No. 8531-62-210D is applicable to Model 1000 from VIN FA4PS-522627 and on, Model 1300 from VIN FA4TS-688440 and on, and Model 1400 from VIN FA4US-500001 (the first production) and on for the Hatchback respectively.
- ③ Part No. 8531-62-310B is applicable to ALL MODELS (1000, 1300 and 1400) of the Hatchback series from the FIRST PRODUCTION and ON (up to now).

# MAZDA PART NUMBERING SYSTEM

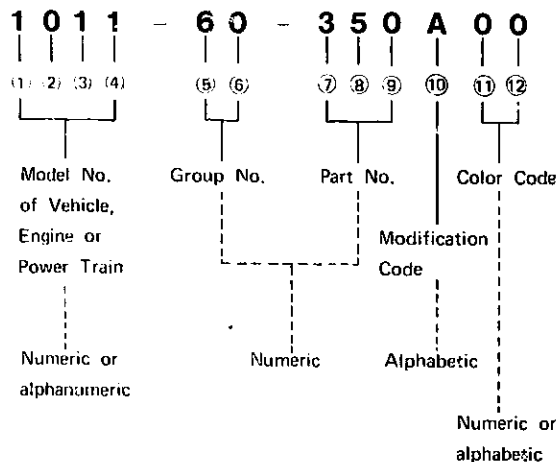

(M)

Mazda Part Numbers are generally classified into three categories: General Parts, Standard Parts and Special Tools.

## MAZDA GENERAL PARTS

The Part Number basically consists of nine or ten digits. The 10th digit (if applicable) denotes modification of the part. It has twelve digits when a color code consisting of two digits is required.

### EXAMPLE

[Note]

If a color code was required but not modification code, the 10th digit would be blank and the color code would follow, e.g.,

1011-60-350\_00

blank

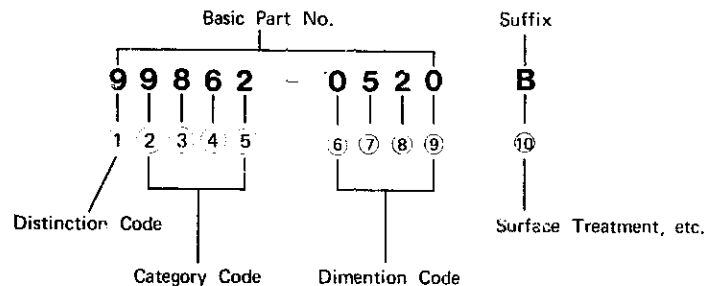

## MAZDA STANDARD PARTS

Those Parts which are standardized in form and dimension such as Bolts, Nuts, Washers, Hoses, Disc Wheels, etc. are called Mazda Standard Parts.

All the Mazda Standard Parts are identified by a Part Number starting with "9". The numbering structure of Standard Parts varies depending upon the kind of parts.

The following is just one example of Standard Part Numbers. For further details and examples, refer to the wall chart, "LIST OF STANDARD PARTS".

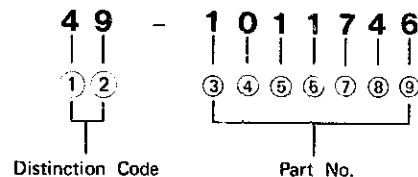

### EXAMPLE

## MAZDA SPECIAL TOOLS

In order to repair Mazda Vehicles, certain equipment is required. Those are called Mazda Special Tools.

### EXAMPLE

[Note]

As Mazda Special Tools are not shown in the Parts Catalog, refer to "LIST OF SPECIAL TOOLS & APPLYING MODELS" as for further details.

# INTERCHANGEABILITY CODE LIST

Code	Definition
AN	 (Both Ways) A new part and the former part are fully interchangeable.
A	 (One Way) A new part can be used in place of the former part, but the former part cannot be used in place of a new part.
C	 A new part with some additional part(s) can be used in place of the former part.
G	 Some modification work is required to use a new part in place of the former part.
S	 (One Way) The former part can be used in place of a new part, but a new part cannot be used in place of the former part.
