VEHICLE IDENTIFICATION SYSTEM FOR RX-7

SERIES (1986~1988)

VIN (= Vehicle Identification Number) for RX-7 series (1986~1988 Year Model) consists of WMI (= World Manufacturer Identifier), VDS (= Vehicle Description Section) and VIS (= Vehicle Identification Section). VDS consisting of six alphanumeric characters denotes the "MODEL SERIES". VIS consisting of eight alphanumeric characters denotes the serial unit number of vehicle and is sequentially numbered within each VDS.

* Check digit is included as a VIN security feature to permit law enforcement verification of the authenticity of a suspected illegal VIN plate. This single digit number is determined, based upon a complex mathematical formula which is applied to each vehicle's VIN number.

** Miscellaneous Identification Code identifies major components such as engine, brake system, cab type, etc.

LOCATION OF VIN PLATE

The plate is attached to the top ledge of the dash panel under the bonnet (engine hood), refer to the illustration shown right.

[NOTE]

If the VIN (chassis) reference number in the PCM (Parts catalog microfiche) appeared as

FC33 •-100001

the vehicle's VIN would be e.g. FC3311H0100001.

INSTRUCTIONS

HOW TO LOCATE PARTS

There are four approaches to locate parts as follows.

Open the catalog to the illustration page indicating the referred section number at the upper left corner of the page

Find the D-code indicated for the desired part in the illustration

All your necessary information on the desired part is found at the referred D-code that is located within the related text (s) following the illustration

IMPORTANT

If you are not sure which parts catalog compiled to cover the model you are researching, refer to **MODEL IDENTIFICATION** and/or **VEHICLE IDENTIFICATION SYSTEM** located at the very front part of the parts catalog

The illustration and related text pages are compiled in numerical sequence by section number through the parts catalog

However, there is one exception the section number. "0900 key sets" is always located in the first part of Body group

D-code

In the text the D-codes and the related information are listed in the alphabetical and numerical sequence by D-code within each section number

HOW TO INTERPRET THE ILLUSTRATION

In the example shown below, each item is interpreted as follows

1 SECTION NUMBER

Each illustration is identified by Section Number which indicates the group of parts classified by function.

2 SECTION NAME

3 SECTION'S APPLICATION

The section's application is indicated in parentheses () below the section name when the affected illustration/text is applicable to specific model, certain period of the production, etc.

4 D-CODE (KEY NUMBER)

The D-code consisting of five or six digits serves as a "KEY NUMBER" to co-ordinate a drawing with its detail information in the text.

5 RELATIONSHIP BETWEEN ASSEMBLY AND ITS COMPONENTS

The relationship between an Assembly and its Components is illustrated only by drawing. The example shown left denotes that D-code 68420 includes D-codes, 68421A, 68422 and 68425 and standard part numbers, 9986505168, 999100503 and 997390414.

6 STANDARD PART NUMBER

Nine or ten-digit number which appears in the illustration is standard part number. The standard part number indicated in the illustration instead of D-code does not appear in the related text.

HOW TO INTERPRET THE TEXT

In the example shown below, each item is interpreted as follows.

1 SECTION NUMBER

2 TEXT SEQUENCE NUMBER

The number following a hyphen denotes the text sequence number within each section number

3 SECTION NAME

4 SECTION'S APPLICATION

5 D-CODE

In the text, D-codes and the related information are listed in the alphabetic and numeric sequence by D-code within each section number

6 PART NAME

Part name is described for each D-code in one through three languages out of four languages such as English, French, Spanish and German.
The indicated languages vary, depending upon the market which the parts catalog is applicable to.

7 PART NUMBER

Under one D-code, if there are more than one part number due to the part change involved, the part numbers are listed in the sequence of the part production timing the early used part number is shown first and the later one follows it

8 INTERCHANGEABILITY CODE

One or two-digit alphabet appearing in the extrem left hand side of the text is an interchangeability code
This code indicates the nature of interchangeability between the two part numbers shown in the right with parentheses and above.

The following interchangeability codes have been currently used in the parts catalog

Code	Definition
A	One Way: A new part can be used in place of the former part but the former part cannot be used in place of the new part
A'	Both Way: A new part and the former part are fully interchangeable
C	Plus: A new part requires additional parts to be used in place of the former part
CG	Plus: A new part requires additional parts and modification work to be used in place of the former part
G	Plus: A new part requires modification work to be used in place of the former part
S	One Way, Backward: The former part can be used in place of a new part but the new part cannot be used in place of the former part

16 SUPERSEDING PART NUMBER

When a part is changed and new part is interchangeable with the former part, the new part number as the superseding part is shown in parentheses right under the former (superseded) part number

17 NEW PART NUMBER IDENTIFICATION

An asterisk (*) denotes that the indicated part number has been added since the last microfiche edition (not the last paper edition)

The microfiche parts catalog is revised more frequently than the paper one

18 QUANTITY

This denotes the quantity of the part used under the indicated D-code within each section number

19 MODEL APPLICATION

This information is also described in one through three languages

21 COLOR CODE OF PART NUMBER

For color keyed parts, two-digit color code(s) appear(s) right under its basic part number consisting of nine or ten digits. The complete part number for color keyed parts consists of the basic part number (9 or 10 digits) and the color code (2 digits)

22 INTERIOR or PAINT CODE FOR VEHICLE

The applicable interior or paint code(s) for the vehicle is (are) indicated to each color code of part number

23 COLOR DESCRIPTION OF PART

A color description of the part is indicated to each part's color code in one through three languages

24 PART CHANGE DATE

When a part is added, changed or deleted, the effective date coded in four digits is shown as follows.

Example

MAZDA PART NUMBERING SYSTEM

Mazda Part Numbers are generally classified into three categories:
General Service Parts & Accessories, Standard Parts and Special Tools.

Note: Mazda Part Number consists of numeric and alphabet letters. In order to avoid the confusion due to similar characters among number and alphabet, alphabet letters I and O are not used in the part number. However, these letters are rarely used in 10th digit of the part number as an exception.

MAZDA GENERAL SERVICE PARTS & MAZDA ACCESSORIES

These part numbers basically consist of nine or ten digits. The 10th digit (if applicable) identifies the engineering change of the part. The color keyed part, however, consists of twelve digits since two-digit color code are added to nine or ten-digit number to identify its color.

Note: In case the engineering change is not made to a part, the 10th digit of the part number is left blank even for the color coded part, e.g.,

BA01-60-350 00
Blank

MAZDA STANDARD PARTS

The Parts standardized in form and dimension such as Bolts, Nuts, Washers, Hoses, Disc Wheels, etc. are called Mazda Standard Parts.

All Mazda Standard Part Numbers are identified by "9" in the first digit. The numbering structure of Standard Parts varies, depending upon the type of part.

The following is just one example of Standard Part Number.

For further details and examples, refer to the wall chart, "LIST OF STANDARD PARTS".

MAZDA SPECIAL TOOLS

In order to repair Mazda Vehicles, several special tools are required. These are called Mazda Special Tools. Mazda Special Tools are identified by the Part Number starting with "49".
